PETITION FOR REVIVAL OF AN APPLICATION FOR PATENT UNINTENTIONALLY ABANDONED UNDER 37 CFR 1.137(b)

Box DAC Assistant Commissioner for Patents Washington, DC 20231

Sir:

The above-identified application became abandoned for failure to complete the requirements of 35 USC 371(c) within the time period set in 37 CFR 1.495(b). More specifically, the above-identified application is the national stage of an international PCT application for which entry into the United States should have been completed by 30 months from the priority date, i.e., by 30 months from the filing on April 4, 1997 of U.S. provisional application number 60/042,664. More specifically, this application should have been filed by October 4, 1999. This application had therefore become abandoned on October 4, 1999.

Applicants hereby petition for revival of this application.

(1) Attached to this Petition are all necessary documents for completing the filing of this application, i.e., for completing entry into the United States of PCT application PCT/US97/16522;

430 Rec'd T/PTO 2 1 DEC 1999

- (2) Please charge Deposit Account No. 07/1765 in the amount of \$1210.00 for the Petition Fee, pursuant to 37 CFR 1.17(m), large entity, and any other fees that may be required;
- (3) The entire delay in filing the required reply or other required action, from the due date for the reply or other action, until the filing of a grantable petition pursuant to paragraph 37 CFR 1.137(b) was unintentional.

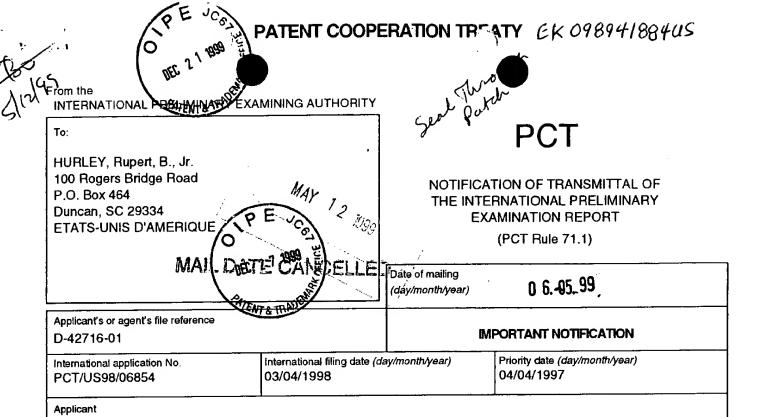

In summary, Applicant hereby petitions for the late acceptance of the application papers for entry into the U.S. national stage of PCT/US98/06854 and the revival of this application as having become unintentionally abandoned.

Any comments or questions can be directed to Applicants' undersigned attorney at telephone number (864) 433-3247.

Respectfully submitted,

Rupert B. Hurley Jr. Registration No. 29,313

December 21, 1999 CRYOVAC, INC. P. O. Box 464 Duncan, SC 29334 (864) 433-3247

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

CRYOVAC INCORPORATED et al.

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

To section V

The following documents are considered: 1.

D1....GB-A-2 291 402

D2.....WO-A-96 00688.

- The application does not meet the requirements of Article 84 EPC, because 2. claims 1, 2 and 14 are not clear as indicated in section VIII.
- Furthermore as indicated in connection with the lack of clarity in section VIII, 3. paragraphs 1.1 and 1.2, insofar as the present text can be understood, the subject-matters of claims 1 and 14 do not involve an inventive step, and therefore do not satisfy the criterion set forth in Article 33(3) PCT.
- An independent product and method claim clarified as indicated in section VIII 4. should satisfy the requirements of Article 33 (2) and (3) PCT since none of the available documents gives an indication leading to a patch bag having only one seal extending through the sides of the bag as well as the patch(es) such that under the conditions/parameters to be defined - the seal has the desired strength as e.g. defined in claim 2.
- The additional features of claims 3 13 do not define the parameters required to 5. clearly define the subject-matter of claim 1 or claim 2. Since they furthermore relate to properties coming, depending on circumstances, within regular design practice they cannot be considered as satisfying the requirement of Article 33 (3) PCT. This applies correspondingly with regard to claims 15 - 20 and 23.
- The process parameters defined within claims 21, 22 are, within the process 6. according to claim 14, not suggested by the prior art such that, in combination (due to reasons of clarity, cf. section VIII), claims 21, 22 should satisfy the requirement of Article 33 (2) and (3) PCT.

To section VII

The independent claims have not been properly cast in the two-part form (Rule 1.1

- 1.2 Reference signs in parentheses should have been inserted in the claims to increase their intelligibility, Rule 6.2(b) PCT. This applies to both the preamble and characterising portion.
- 1.3 To meet the requirements of Rule 5.1(a)(ii) PCT, the documents D1 and D2 should have been identified in the description and the relevant background art disclosed therein should have been briefly discussed.
- 1.5 The units inch, psi, °F, mils expressed on pages 1 6, 16, 17, 20, 22, 26 and the claims do not meet the requirements of Rule 10.1 (a, b) PCT and should have been replaced by the appropriate SI units. The present expressions should, however, have been retained in parentheses after the replacement expressions.
- 1.7 Within the figures reference numerals (cf. e.g. the figures as filed with the application) are missing.

To section VIII

1.1 Claim 1 is not clear (Article 6 PCT) since it is not clearly indicated under which conditions (e.g. material of the bag and patches; parameters of heat sealing etc; cf. claims 21, 22) the only seal is provided on the end seal bag. Cf. D1, page 2, line 25 - page 3, line 2, where it is indicated that "sealing by passing heat through one or more patches is undesirable because such seals are not as strong as seals made through the bag alone".

Thus a clear definition of the subject-matter of claim 1, and also to distinguish claim 1 clearly from the prior art attempt disclosed in D1, requires that the parameters which - contrary to the known approach - make it possible that the only seal provided, which goes through the patch(es) as well as both sides of the bag, has the required strength (e.g. as defined in claim 2).

Definition of these parameters is also required in order that the problem (cf. page 1, lines 21 - 25) is solved. For this problem being solved it furthermore is required that within claim 1 the strength of the seal is defined as it is the case for claim 2 (cf. also page 1, lines 29 - 32).

- 1.2 Without the clear definition referred to above the subject-matter of claim 1 needs to be considered as being obvious in view of the (unsuccessful) approach disclosed in D1, since the teaching of present claim 1 essentially does not go beyond the description of the unsuccessful attempt in D1 (page 2, line 29 - page 3, line 2). This applies for corresponding reasons with regard to claims 2 and 14.
- 1.3 Claims 2 and 14 are unclear for reasons corresponding to the ones given with respect to claim 1 and furthermore since, contrary to claim 1, the essential feature is missing according to which the seal referred to is the only one (cf. page 1, lines 21 - 25; page 2, lines 6, 7).
- 1.4 Claim 14 furthermore is unclear since contrary to the subject-matter of claim 1 and of claim 2 essential material properties are missing, according to which the tubular bag film as well as the patch film are heat-shrinkable.
- 1.5 The additional features of claim 15: provision of a first and a second sealing bar as means for heating, appear as being essential for the process according to claim 14 and are thus missing in this claim.
- The general statement in the description at page 29, lines 23 27 (reference to 2. "principles" of the invention) is not clear, and when used to interpret the claims renders them also unclear, contrary to Article 6 PCT.

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirement that Treaty, the Patent Cooperation Treaty, the Regulations a Administrative Instructions under that Treaty. In case of discretions between these Notes and those requirements, the applicable. For more detailed information, see also the Po-Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international phulication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the International application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

The letter must indicate the differences between the claims as filed and the constant as a same and it must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples Illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
 Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added.
- [Where originally there were 15 claims and after amendment of all claims there are 11]: "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
 "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
 - "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added."
 "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

it must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide
